LinkedIn | GitHub | Portfolio

SUMMARY

Computer Science and Engineering graduate from BRAC University (CGPA 3.79) with hands-on experience building responsive web applications and CRM/CMS systems at Fleeting Trails, plus applied machine-learning projects across healthcare, NLP and customer analytics. Skilled in React, Next.js and Node.js on the web side, and in Python-based ML workflows with scikit-learn, PyTorch, XGBoost and SHAP. Open to full-stack and applied ML roles.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer 01/2026 – 06/2026
Fleeting Trails *Remote, Dhaka, Bangladesh*

- Designed and developed a responsive B2C website and dynamic Admin Panel from scratch (Figma → ReactJS) with intuitive user flows, reusable components, scalable architecture, and Redux-based state management.
- Built modular CRM and CMS modules with robust user management, content control, analytics, and white-label capabilities, enabling rapid customization and long-term maintainability.

TECHNICAL SKILLS

Languages	Python, C++, Java, JavaScript, SQL
Frontend	React, Next.js, TypeScript, Tailwind CSS, Framer Motion, Redux, Figma
Backend	Node.js, Express, MongoDB, Firebase, JWT Authentication, Cron Scheduling
Machine Learning	PyTorch, TensorFlow, scikit-learn, XGBoost, SHAP, SMOTE
Data Science	Python, Pandas, PySpark, Statistics, Time Series Analysis, Feature Engineering
AI & LLMs	Groq API, Prompt Engineering, LLM Fine-Tuning (LoRA, Unsloth), NLP, Microsoft Copilot
Tools	Git & GitHub, Vercel, Jupyter Notebook, Linux (WSL)

PROJECTS

Cheap Chip *(team project)* Live | GitHub

- Marketplace for refurbished hardware with an AI diagnostic engine, real-time map view and Stripe payments.
- **Tech:** Next.js, React, Groq API, Stripe, MapLibre, Vercel

CG Savior *(team project)* Live | Client | Server

- Student productivity platform with resource management, smart routine planners and community-driven content voting.
- **Tech:** React, Node.js, Express, MongoDB, Firebase

JARVIS Productivity Platform GitHub

- Academic command center with real-time class tracking, cron-scheduled reminders and JWT authentication.
- **Tech:** React, Node.js, Express, MongoDB, JWT, Cron

Parkinson's Disease Detection GitHub

- Analyzed 9M+ keystrokes for early detection, balancing classes with SMOTE and explaining ensemble predictions with SHAP.
- **Tech:** Python, XGBoost, SHAP, SMOTE, Ensemble Learning

News Topic Classification Benchmark GitHub

- Benchmarked 24+ architectures comparing TF-IDF and Skip-gram embeddings, including GRU-based deep models.
- **Tech:** Python, PyTorch, TensorFlow, GRU, TF-IDF, Word Embeddings

Bank Customer Demographic Inference GitHub

- Predicted client age on 41,188 records (MLP: R^2 0.44, RMSE 7.76 years), then segmented customers into three cohorts with K-Means.
- **Tech:** Python, scikit-learn, Pandas, Seaborn, MLP, K-Means

Lifestyle Biometric Age Prediction GitHub

- Predicted age from lifestyle and biometric data (2,111 records) using engineered BMI features; the MLP improved R^2 by about 80% over linear regression.
- **Tech:** Python, scikit-learn, Pandas, MLP, Decision Trees

CERTIFICATIONS

- **DataCamp:** Exploratory Data Analysis · Feature Engineering · Introduction to Data Science in Python · Introduction to PySpark · Statistics in Python · Supervised Learning · Time Series Analysis
- AI Prompt Engineering, Level 1
- Microsoft Copilot Certification

All certificates: github.com/ZoZoGami/certificates-portfolio

EDUCATION

BSc in Computer Science and Engineering (CSE) 01/2023 – 10/2026
BRAC University *Dhaka, Bangladesh*

- CGPA: 3.79
- Thesis (team of three): *Model Pragmatic Implicature on Language Models using Explicit Pragmatic Thought-Chains*
